II Operating Instructions

◆ How to switch it on?

Shutdown mode ,long press 'On/Off switch' button and do not release the button for 2 seconds until the yellow light is on this product boot after startup and first into the TF card test condition. According to the different capacity of the card, testing time takes about two seconds. Test results show as the following:

▲The yellow light flashes 1 time and then long bright, says TF card (micro sd card)detection successful, and into standby mode.

▲The red light flashes 3 times and then extinguishes, says no card or unidentifiable card.

▲The red light flashes nine times and then and then extinguishes, says no residual capacity of the TF card (micro sd card).

▲If the red and yellow lights are both on for 0.5 seconds, and then extinguishes and the product is shutdown, says that the battery power is not enough at this time and needs to recharge.

◆ How to take photos ?

In standby mode, short press the 'On/Off Switch yellow light flashes a time, says a photo shoot and save to TF card successfully If the red light flashes a time, says a failure of taking photos at this time, need to power off and please restart again

◆ How to make a video record ? (Long press 'On/Off Switch' for one second .)

▲In standby mode, short press 'On/Off Switch 'till the yellow light flashes three times (flashing 3 times means the product prepare video record).After flashing 3 times The product begins to make a video record

(Notice :should release the button when the yellow light is flashing 3 times .If do not release the button ,the product can not make the video record ,but turn to be off .)

▲During the video ,the yellow light flash a time in every 2 seconds ,says the product is video recording

▲During the video ,short press 'On/Off Switch ,this products stops from recording the video and save the video (The yellow light flashes quickly when you save the video to the TF cards/Micro sd card .)Then return to the standby state ,the blue light is on for a long time

▲During the video, long press the 'On/Off Switch this product stops video and save video files, and then immediately turned off.

▲During the video, if TF card in the process of surplus space is insufficient, the product will stop video, automatic save video file before shutdown.

▲During the video, if the battery in the process of only 5% remaining, this product will be forced to stop video and save the video files,in case of failing to save the video files normally before shutdown for the electricity shortage.

(Notice The video files were not saved normally can be tried to repair through a third party software .)

◆ How to turn off ?(Long press 'On/Off Switch 'for 3 seconds .)

▲Manual shutdown: In the standby mode,Long press 'On/Off Switch 'till the yellow light flashes 3 times (flashing 3 times means the product prepare to video record),At this time ,press the switch do not release and the yellow light flashes 3 times and do not begin to video record ,then the red light is on for 2 seconds and shutdown.

▲Automatic shutdown. In normal mode, no video nor the key operate, after 30 seconds ,the product will be turned off automatically for saving battery.

▲The red light and blue lights both are off when the product is in the off state

◆ How to charge?

Can use common USB cable connected to a computer or other 5 V charger to charge.

▲Red light is flashing slowly says it is charging to the battery.

▲The red light long bright, says the battery has a fully charged.(The battery takes about three hours or so.)

▲Please choose the resistor less than 1.5 ohms when buy USB cable wire, otherwise the cannot completely full of lithium batteries.

◆ How to show the correct time on video files?

▲This product has video and time synchronization function, Time adjustments can be altered according to your request
Specific operation as follows:

This product will automatically establish a named time. TXT text file in the TF card of the root directory after startup. File content is 2011-05-01 23:59:59. Users can change the date and time and save the file according to this format .When once again turned on, this product will read the time and save to into the product No matter start up and shut down afterwards, this product can be the automatic timer.
